Computer Science graduate with hands-on experience supporting Windows Server and Azure environments, troubleshooting business systems, automating workflows, and developing full-stack applications. Combines analytical problem-solving, technical communication, and collaborative delivery with the ability to adapt quickly to maintain reliable technology operations and perform effectively with limited resources. Pursuing entry-level cybersecurity, cloud, or technology consulting roles.

EDUCATION

Virginia Tech

Bachelor's of Computer Science

Blacksburg, VA

Aug 2023 — May 2026

WORK EXPERIENCE

IT Intern

June 2023 — Aug 2023

Unfold Hospitality

Washington, D.C.

- Supported Windows Server operating systems and Azure networks, troubleshooting resolving connectivity and file-access issues to help nontechnical users reliably maintain reliable access to business-critical resources for nontechnical users.
- Trained nontechnical users on the MarginEdge restaurant-management platform and diagnosed and debugged inventory-system errors, translating technical issues into clear guidance and practical solutions resolutions.
- Developed a TypeScript-based tracking system solution that automated an accounting workflow and improved information visibility for senior employees.

Contracted Lab Assistant

June 2022 — Aug 2022

Global Mineral Sands, Inc

Icey Bay, AK

- Supported exploration and field-work activities for Alaska's Mental Health Trust during a multi-month assignment at a remote camp, adapting quickly to demanding conditions, changing priorities, and limited resources.
- Assisted with onsite laboratory construction and operations, heavy-machinery use, sample recovery quality assurance, sample logging, and real-time sample preparation.
- Operated geological surveying equipment and field tools, troubleshoot equipment issues, and supported mineralogic analyses to help sustain safe, efficient exploration and laboratory operations.

PROJECTS

PokeChallenge Manager

Jan 2026 — May 2026

- Developed a containerized full-stack web application using React, Node.js, Express.js, MySQL, and Docker, integrating the front end, application programming interface, and relational database.
- Collaborated with a project partner to design and develop the front-end solution, debug the application front-end solution, troubleshoot defects, and prepare for milestone demonstrations.
- Led midterm and final presentations for the capstone proctor, explaining, communicating the application's architecture, development approach, challenges, and results to.

SKILLS

- **Programming Languages:** Python, JavaScript, Java, C/C++, HTML/CSS, SQL
- **Libraries:** React, Node.js, Express.js, JUnit, NumPy, Bootstrap, jQuery
- **Tools:** Git, Docker, MySQL, VS Code, Eclipse, JIRA, MarginEdge
